HOW TO ACCOMODATE DYSLEXIC USERS

GOOD:

- Black text against white background
- **BOLDED, BIG, ALL CAPS TITLES**
- Good spacing between text lines
- Navigation bar, minimal text
- Consistent two column layout

BAD:

- Description text color is too faint
- Too many pieces visible at one time, too much text for dyslexic person in one screen
- No images to go along with work besides photography section
- Tags and descriptions use small text
- The about section uses weird spacing
